Keywords: transport processes/heat transfer (theory), diffusion

There are two errors in this paper:
(1) Five lines after equation (11), the joining condition should read $\mathcal{E}^{\mathrm{II}}(L-b)=$ $q \mathcal{E}^{\mathrm{I}}(L-b-1)+p$.
(2) In equation (12), the first equality should read

$$
\mathcal{E}^{\mathrm{I}}(x)=1-q^{x}-\frac{x p q^{x+b}}{1-y p q^{b}} .
$$

This equality follows from the calculational steps outlined in the previous paragraph of the paper; only the result quoted in equation (12) is incorrect.

## Acknowledgment

We thank Dr Dror Parnes for pointing out these errors.
