

Contents

1	FUNDAMENTALS	1
1.0	Historical Prelude	1
1.1	What is a First-Passage Process?	1
1.2	Probability Distribution of a One-Dimensional Random Walk	3
1.2.1	Discrete Space and Time	4
1.2.2	Discrete Space and Continuous Time	8
1.2.3	Continuous Space and Time	11
1.3	First-Passage, Occupation, and Return Probabilities	14
1.4	Real-Time Quantities and Their Transforms	15
1.5	Asymptotics of the First-Passage Probability	18
1.5.1	Continuous time	18
1.5.2	Discrete time	20
1.6	Connection between First-Passage and Electrostatics	22
1.7	Kolmogorov Formalism	24
1.8	Epilogue	28
2	DIFFUSION IN THE INTERVAL	31
2.1	Basic Questions	31
2.2	The Survival Probability	32
2.2.1	Isotropic Diffusion	32
2.2.2	Biased Diffusion	35
2.3	Exit/Splitting Probabilities and Exit Times	37
2.3.1	Isotropic Diffusion	37
2.3.2	Biased Diffusion	43
2.4	Electrostatic Formulation for Exit Probabilities & Exit Times	45
2.4.1	Exit/Splitting Probabilities	45
2.4.2	Exit Times	47
2.5	Martingale Method	49
2.6	Kolmogorov Approach	51
2.6.1	The survival probability	51
2.6.2	Hitting times	52
2.7	Discrete Random Walk	58
2.7.1	Illustration for a Short Chain	58
2.7.2	Exit Probabilities	61
2.7.3	Exit Time and its Moments	64
3	HETEROGENEOUS INTERVAL	67
3.1	Discrete Hopping	68
3.2	Smooth Potential	74
3.3	Consensus Formation Models	75
3.3.1	The Voter Model	75
3.3.2	The Skeptical Voter Model	77

3.3.3	Majority Rule Model	80
3.3.4	The Backgammon Model	83
3.4	The Freely Accelerated Particle	85
3.5	The Growing Interval	87
3.5.1	Slowly Expanding Cage: Adiabatic Approximation	88
3.5.2	Rapidly Expanding Cage: Free Approximation	88
3.5.3	Marginally Expanding Cage	89
3.5.4	Iterated Logarithm Law for Ultimate Survival	90
3.6	The Moving Cliff	92
3.6.1	Rapidly Moving Cliff	92
3.6.2	Marginally Moving Cliff	92
3.6.3	Diffusing Cliff	94
4	THE SEMI-INFINITE LINE	99
4.1	The Concentration Profile	99
4.1.1	Green's Function Solution	99
4.1.2	Image Method	100
4.2	First-Passage Properties	103
4.2.1	Isotropic Diffusion	103
4.2.2	Biased Diffusion	108
4.3	Duality	109
4.4	Heterogeneous Hopping	112
4.5	Imperfect Absorption	114
4.5.1	Radiation Boundary Condition	114
4.5.2	Connection to a Composite Medium	116
4.5.3	Equivalence to the Radiation Boundary Condition	118
4.6	General Hopping Processes	119
4.7	Semi-Infinite Slab	120
5	FIRST-PASSAGE SHAPES	123
5.1	Arcsine Laws in Brownian Motion	123
5.2	Brownian Excursion and Bridge	128
5.3	Brownian Meander	129
5.3.1	Average Shape	130
5.3.2	Crossing Times	131
5.3.3	Intermediate Position	134
5.3.4	Area Under a Brownian Meander	135
5.4	Discrete Random Walk	137
5.4.1	The Reflection Principle	137
5.4.2	Consequences for First Passage	138
5.4.3	Return Paths and Catalan Numbers	140
5.4.4	Origin Crossing Statistics and the First Arcsine Law	141
6	APPLICATIONS	149
6.1	Neuron Dynamics	149
6.2	Self-Organized Criticality	152
6.2.1	Isotropic and Directed Sandpile Models	152
6.2.2	Bak-Sneppen Model	154
6.2.3	Related Systems	157
6.3	Growth and Shrinking	159
6.3.1	Birth-Death Dynamics	159
6.3.2	Queuing Dynamics	163
6.4	Kinetics of Spin Systems	166
6.4.1	The One-Dimensional Ising-Glauber Model	167

6.4.2	The Lattice Voter Model	169
6.5	First Passage in Composite and Fluctuating Systems	170
6.5.1	Resonant First Passage in a Fluctuating Medium	174
6.6	The Run-and-Tumble Particle	177
6.6.1	The Probability Distribution	178
6.6.2	First Passage Properties	179
6.7	The “Hot Hand” Paradox	183
6.8	Transience of the Pólya Urn	186
6.9	Telomere Dynamics and Immortality	189
6.10	First-Passage Resetting	190
6.10.1	Number of Reset Events	191
6.10.2	Domain Growth by First-Passage Resetting	192
6.11	Single-Source Multiplication	195
7	SPHERICAL SYMMETRY	201
7.1	First Passage to a Sphere	201
7.2	Concentric Spheres	205
7.2.1	Splitting Probability	205
7.2.2	Hitting Time	207
7.3	Time-Dependent First-Passage Properties	209
7.4	Reaction Rate Theory	212
7.4.1	Time-Dependent Solution for General d	213
7.4.2	Elementary Time-Dependent Solution for $d = 3$	215
7.4.3	The Quasi-Static Approximation	216
7.4.4	Closest Particle to an Absorbing Sphere	217
7.4.5	Chemoreception	219
8	UNBOUNDED DOMAINS	223
8.1	The Wedge	224
8.1.1	Survival Probability	224
8.1.2	Conformal Transformations and Electrostatics	227
8.1.3	Hitting Time	230
8.1.4	Time-Dependent First Passage from Electrostatics	232
8.2	The Cone	233
8.2.1	Three dimensions	233
8.2.2	General spatial dimensions	235
8.3	The Paraboloid	237
9	BOUNDED DOMAINS	241
9.1	The Circle and the Sphere	241
9.2	The Square	243
9.2.1	Exit Probability	244
9.2.2	Exit Time	248
9.3	The Triangle	250
10	NETWORKS	253
10.1	Complete Graph and its Extensions	254
10.1.1	Complete Graph	254
10.1.2	Two-Clique Graphs	257
10.1.3	The “Worst” Graph	258
10.2	Erdős-Renyi Random Graph	259
10.2.1	The Almost-Complete Graph	259
10.2.2	Effective Medium Approximation	260
10.3	Star Graph	261
10.4	Cayley Tree	264

10.4.1	The Occupation Probability	264
10.4.2	The First-Passage Probability	266
10.5	Complex Networks	267
10.6	Resistor Networks	269
10.6.1	Relation to Random Walks	270
10.6.2	Escape Probability, Resistance, and Pólya's Theorem	271
10.7	Self-Similar Trees	272
10.7.1	Transmission in the First-Order Tree	273
10.7.2	Exact Renormalization for the N^{th} -Order Tree	274
10.7.3	Reflection in the 3-Tree	277
10.8	Comb Structures	279
10.8.1	Homogeneous Comb	280
10.8.2	Hierarchical Comb	284
10.9	Hydrodynamic Transport	287
10.9.1	Single Sidebranch Network	287
10.9.2	Single Junction Network	290
10.9.3	The Hierarchical Blob	291
11	REACTIONS AND SEARCHING	299
11.1	Reactions as First Passage	299
11.2	Kinetics of the Trapping Reaction	300
11.2.1	Exact Solution in One Dimension	301
11.2.2	Lifshitz Argument for General Spatial Dimension	303
11.3	Few-Particle Reunions and Reactions	305
11.3.1	Two-Particle Reactions	305
11.3.2	Three-Particle Reactions	307
11.3.3	Arbitrary Number of Particles	312
11.3.4	Which Particle Hits First?	313
11.4	Diffusion-Controlled Reactions	316
11.4.1	The Capture Reaction	316
11.4.2	Coalescence, $A + A \rightarrow A$	320
11.4.3	Annihilation, $A + A \rightarrow 0$	322
11.4.4	Aggregation, $A_i + A_k \rightarrow A_{i+j}$	325
11.5	Extinction Dynamics	328
11.5.1	Completion time in coalescence	329
11.5.2	Absorbing-State Dynamics	331
11.6	Ballistic Annihilation	335
11.6.1	Two-Velocity Model	335
11.6.2	Three-Velocity Model	337
11.7	Diffusive Searching	339
11.7.1	Teleportation	340
11.7.2	Search on a DNA Chain	341
11.7.3	Searching with Resetting	344
11.7.4	Multiple Searchers	347
